Portfolio: <https://web-portfolio-one-xi.vercel.app/>

SUMMARY

Full-stack developer specializing in scalable web architecture, Micro-frontend (MFE) systems, and Real-time (Live) integrations. Experienced in building high-performance applications using Next.js, React, Node.js, and Django within agile sprint environments. Expert in Docs-as-Code and Technical Communication, bridging the gap between complex engineering and maintainable production documentation.

SKILLS

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, PHP, Java, HTML5, CSS3.
- **Frontend:** Next.js, React, Redux, Zustand, TanStack Query, Storybook, Rsbuild.
- **Backend:** Node.js, Django, REST API Development, Laravel.
- **DevOps & Tools:** Docker, GitLab, Git, GitHub, Vercel, pnpm, ngrok, Redis, MkDocs.
- **Databases:** PostgreSQL, MySQL, MongoDB, Cassandra.
- **Networking:** IP Addressing, VLANs, ACLs, Firewall Setup, Cisco Configuration.
- **Project Management:** Trello, Slack, Open Project.

Soft Skills

- Problem Solving
- Collaboration
- Time Management
- Technical Communication

WORK EXPERIENCE

Cytech International | SM CDO Downtown Tower

Technical Writer January 2025 – March 2026

- Pioneered the frontend styling and UI customization of a centralized MkDocs platform, ensuring a professional and accessible interface for multi-version technical documentation.
- Architected a multi-version documentation system with structured asset management, allowing stakeholders to toggle between different software release logs.
- Implemented a Docs-as-Code workflow using Markdown and Git, enabling developers to maintain version-controlled content within existing engineering pipelines.
- Engineered custom frontend components for structured reporting and logs, improving the readability of complex data organization and scheduling workflows.
- Optimized content production by leveraging AI-assisted drafting workflows, increasing document delivery speed while maintaining high technical accuracy.
- Collaborated directly with development teams during weekly sprints to deliver production-ready documentation aligned with rapid development objectives.

Web Developer October 2025 – March 2026

- Refactored frontend scanning architecture to support concurrent multi-target API requests, improving batch processing efficiency.
- Engineered centralized Axios client with reusable hooks for secure API communication across micro-frontends.
- Integrated legacy modules into modern micro-frontend architecture while preserving shared configuration stability.
- Built white-label theming system to support multi-tenant branding without impacting shared UI behavior.
- Developed strategic UI components, reusable Storybook patterns, and advanced data visualization charts for risk analysis and business reporting.
- Designed and implemented RESTful APIs using Django for secure data exchange and internal financial/risk-tracking workflows.
- Configured Docker-based development environments and mock data pipelines to standardize team workflows and accelerate rapid demo platforms.
- Built and maintained a risk management dashboard aligned with incident response tracking, mitigation workflows, and cybersecurity-focused modules.
- Optimized frontend build pipelines (Next.js ecosystem) to improve production performance and reliability.
- Delivered demo-ready platforms in 1-week sprint cycles, debugging frontend-backend integration issues to stabilize builds.

Logicbase Interactive | Pabayo-Hayes St, Cagayan de Oro City

Research & Development Intern | Logicbase Interactive February 2025 – May 2025

- Engineered a full-stack OJT Monitoring System featuring real-time notifications and automated logging, which centralized student tracking for supervisors.
- Supported UI/UX prototyping and application interface design to enhance user experience.
- Created multimedia content (video editing, graphics) for internal and project use.
- Supported research and documentation for development workflows.

EDUCATION

B.S. in Information Technology, Database

University of Science and Technology of Southern Philippines (USTP)

Capstone Project: Appointment Booking System for Student-Teacher Consultations
